OBJECTIVE

Seeking a Software Engineering internship to contribute to production systems and grow technical depth through hands-on problem-solving in a collaborative team environment.

EDUCATION

Bachelor of Technology (CSE) - VNR VJIET

Expected 2028

CGPA: 8.93/10

SKILLS

Programming Languages	Java, Python, C
Core Concepts	Data Structures & Algorithms, OOP, Operating Systems
Web Development	React.js, Node.js, Express.js, HTML, CSS, JavaScript, REST API Design
Database	MongoDB, MySQL
Tools	Git, GitHub, VS Code, Vercel, n8n

PROJECTS

Habit Tracker [GitHub](#) – [Live](#) *React.js, CSS, MongoDB, Recharts, Vercel*

- Built a Habit Tracker app with flexible recurrence schedules (daily, weekly, custom) and automatic streak calculation.
- MongoDB stores habit documents with timestamps, Express API computes streaks and completion states.
- React frontend renders monthly grid and Recharts dashboard with instant updates after check-ins.

Library Management System [GitHub](#) – [Live](#) *JavaScript, Node.js, Express.js, MongoDB, REST API*

- Built a web-based library management platform with role-based dashboards for Admin, Faculty, and Students.
- Implemented transaction engine that records book borrowing/returning and automatically calculates fines for overdue books, storing all transaction history in MongoDB.
- Integrated Web Push API with Service Workers for real-time notifications plus a knowledge request module bridging students and faculty.

RR Restaurant WhatsApp AI Assistant [GitHub](#) *n8n, Gemini API, WhatsApp API, Sheets*

- Developed an automated WhatsApp AI assistant using n8n and Google Gemini, enabling customers to place food orders and get answers to FAQs.
- Integrated Google Sheets as a lightweight real-time database to efficiently track incoming orders, manage restaurant inventory, and fetch dynamic responses on the fly.
- Implemented conversational memory using LangChain to retain chat history, resulting in a highly responsive, context-aware, and human-like customer experience.

COMPETITIVE PROGRAMMING

- Solved 300+ DSA problems across LeetCode (100+), Codeforces, SmartInterviews.
- Active participant in weekly/biweekly coding contests.

TRAINING

- MERN Stack Development
- Agentic AI Industrial Training
- Data Structures & Algorithms (SmartInterviews - ongoing)
