OBJECTIVE

Seeking a Software Engineering internship to build production systems, solve complex problems at scale, and contribute meaningful impact through development expertise.

EDUCATION

Bachelor of Technology (CSE) - VNR VJIET

Expected 2028

CGPA: **8.93/10**

SKILLS

Programming Languages	Java, Python, C
Core Concepts	Data Structures & Algorithms, OOP, OS, JWT Authentication
Full-Stack Development	React.js, Node.js, Express.js, HTML, CSS, JavaScript, REST API Design
Database	MongoDB, MySQL
Tools	Git, GitHub, VS Code, Vercel, n8n

PROJECTS

Habit Tracker [GitHub](#) – [Live](#) *React.js, Node.js, Express.js, MongoDB Atlas, Recharts, Vercel*

- Engineered a full-stack Habit Tracker with flexible recurrence schedules (daily, weekly, custom) and automatic streak calculation across user sessions.
- Designed MongoDB Atlas schema storing per-user habit documents with timestamps; Express REST API computes streaks and partial completion states at query time.
- Built React frontend rendering a monthly grid and Recharts analytics dashboard, updating instantly after each check-in without full page reloads.

Library Management System [GitHub](#) – [Live](#) *Node.js, Express.js, MongoDB, JWT, REST API*

- Architected a role-based web application (Admin, Faculty, Student) with JWT authentication and middleware-enforced authorization protecting all REST API endpoints.
- Developed transaction engine tracking book borrowing and returns with automated fine calculation for overdue records, persisting full history in MongoDB.
- Integrated Web Push API with Service Workers and VAPID keys for real-time browser notifications on due dates and Knowledge-sharing Feature, eliminating manual follow-up.

RR Restaurant WhatsApp AI Assistant [GitHub](#) *n8n, Gemini API, WhatsApp Cloud API, Google Sheets*

- Built an n8n automation workflow that receives inbound WhatsApp messages via webhook and routes them through a Gemini API node with a system prompt encoding the restaurant menu and ordering logic.
- Implemented stateful conversation memory by appending each user message and model response to a session object, passing full history as context on every Gemini API call for coherent multi-turn dialogue.
- Connected confirmed orders to a Google Sheets write node for real-time order logging and inventory tracking, delivering a serverless end-to-end ordering pipeline with zero dedicated backend infrastructure.

COMPETITIVE PROGRAMMING

- Solved 300+ DSA problems across LeetCode (100+), Codeforces, and SmartInterviews, focusing on arrays, trees, graphs, and dynamic programming.
- Active participant in LeetCode weekly and Codeforces rated contests.

CERTIFICATIONS

- IBM AI Fundamentals – *IBM SkillsBuild*
- Certified System Administrator (CSA) – *ServiceNow*
- MERN Stack Development – *Industrial Training*
- Data Structures & Algorithms – *SmartInterviews (ongoing)*
