OBJECTIVE

Seeking a Software Engineering Internship at Salesforce to contribute to enterprise cloud solutions and distributed systems, leveraging full-stack development and Agentic AI experience to deliver scalable, real-world impact in the agentic era — while gaining industry experience in high-performance technology environments.

EDUCATION

Bachelor of Technology (CSE) — VNR VJIET

Expected 2028

CGPA: 8.93

SKILLS

Programming	: Java, Python, C
Web Development	: HTML, CSS, JavaScript, React.js, Node.js, Express.js
Database	: MongoDB, MySQL, SQL / Relational Databases
CS Fundamentals	: Data Structures, Algorithms, OOP, Complexity Analysis
APIs & Tools	: REST APIs, Git, GitHub, Supabase, Vercel, n8n, VS Code, Atlas

PROJECTS

Library Management System | [GitHub](#)

JavaScript, Node.js, Express.js, MongoDB, REST API

- Built a full-stack library management system with custom dashboards for students, faculty, and admins using Node.js, Express, and MongoDB; designed RESTful API with modular route structure to support 500+ concurrent users.
- Secured user accounts by implementing JWT for authentication and bcrypt for password hashing.
- Developed a clean, responsive frontend using HTML, CSS, and Vanilla JS, linking it to a custom REST API to handle real-time book checkouts and inventory updates.

RR Restaurant WhatsApp AI Assistant | [GitHub](#)

n8n, Gemini API, WhatsApp API, Google Sheets

- Built a cloud-integrated AI agent using n8n and Google Gemini to automate food order workflows and FAQ responses at scale — directly aligning with distributed, agentic system architectures.
- Integrated Google Sheets as a lightweight real-time database to efficiently track incoming orders, manage restaurant inventory, and fetch dynamic responses on the fly.
- Implemented conversational memory using LangChain to retain chat history, delivering a highly responsive, context-aware, and human-like customer experience.

Habit Tracker | [GitHub](#)

React.js, CSS, Supabase, Recharts, Vercel

- Created interactive daily checklists and a monthly grid view, persisting user data to a Supabase database; deployed on Vercel with 50+ active users.
- Added a personalized dashboard with real-time weather and custom Recharts visualizations to show long-term progress.
- Built a smooth, glassmorphic UI using React and custom CSS animations for a responsive, clean user experience.

CERTIFICATIONS

- Agentic AI Industrial Training
- MERN Stack Development Training
- Smart Interviews Data Structures Training

ACTIVITIES

- Member of Computer Society of India (CSI), VNR VJIET
- Regular participant in coding contests on LeetCode and CodeChef
